Start Your Career in Music and Audio Production

While listening to the radio or watching TV, do you dream of being a producer or engineer? Are you interested in creating attention-getting audio? Take your love of music and audio production and turn those passions into a successful career.

“its award winning faculty and state-of-the-art hardware and software...”

The Digital Media Arts (DMX) program of the New York School of Career and Applied Studies (NYSCAS), a division of Touro College, offers students real-world, hands-on skills, as well as in-depth technical knowledge into the fascinating world of audio arts. With its award winning faculty and state-of-the-art hardware and software, the DMX program prepares students to work in recording studios, live sound reinforcement venues, audio for film, video/television, audio production, record companies, broadcast and more. Classes are limited to twenty students and are taught from industry veterans.

Upon completion, students receive a Certificate in Digital Media Arts and earn credits toward an Associate in Occupational Studies (A.O.S.) degree in Information Systems with a concentration in Digital Applications from NYSCAS.

Start earning college credit while training for your career in the field you love! Become an Audio Engineer at DMX! Call 877-DMX-7161. Visit us online at www.dmx.touro.edu.

Touro College is an equal opportunity institution. Transfer credits are accepted.

The City College Masters Degree Program in Information Systems (MIS) is intended for working professionals with backgrounds in engineering or science who wish to develop their careers in information management. Leveraging its position in the Grove School of Engineering, the MIS program teaches concepts of business software and system management, economics and finance, and quantitative management skills. The program emphasizes practice and applications that enhance ability to analyze computer and information needs as well as to develop immediate and long-range business plans.

The program is offered in the evening, and is designed so that working students can complete it in less than two years. It offers an affordable package featuring state-of-the-art coursework in business-critical areas, culminating in an intensive independent project in the final semester in an area of specialization of interest to the student, chosen in consultation with the program faculty. Students will work together and build teamwork skills throughout the entire program. The curriculum consists of a fixed sequence of required courses followed by an independent project.

“designed so that working students can complete it in less than two years.”

The City College MIS program provides great learning opportunities for professionals who will be responsible for the next generation of business information technology. This two-year degree program has been carefully crafted to further the career interests of its participants. It is designed to promote a wide variety of intellectual activities and at the same time to build lasting professional relationships among its graduates. Visit http://mis.engr.ccny.cuny.edu to learn more about the MIS program.
